

February 26, 2023

Dear Hiring Manager,

I am a sophomore at the University of Arizona studying Computer science. I am writing to apply for the Data Scientist Internship at Viasat advertised during the University of Arizona STEM career fair. I am excited about working as a data scientist, and would welcome the opportunity to bring my strong communication skills, creativity, and data science experience to your growing team.

Viasat's commitment to delivering reliable internet across of particular interest to me because of my passion for equal opportunities for all. In the past I have volunteered for Habitat for Humanity to build houses and other infrastructure for those who need it most. I have also volunteered at various food banks in the past to give back to the communities around us. As important as the three basic necessities (food, shelter, and water) are, in today's world, access to technology is becoming nearly as important to survival. That is one of the reasons why I am so passionate to work at Viasat.

I also believe I would be a great fit for the Data Scientist Internship at Viasat. For the past two and a half years, I worked as a data scientist for Prime Trust, a fintech company specializing in crypto currency. I designed internal dashboards, created a data table, and worked with different data APIs. Also, having worked at a company that dealt with new technologies, (ie. crypto currencies) I understand the eccentric work life when working with ground breaking technologies (ie. satellite internet) where no one knows all the answers. Throughout my past two and a half years at prime trust, I consistently strived to organize data in a way that was easy to use and tailored to the needs of any employee at the company.

Thank you for your consideration. I very much look forward to the opportunity to speak with you in person about my interest in the position.

Sincerely,

Logan Pageler
